

# AlphaX

"Propelling Your Crypto Journey Beyond the Horizon!"

# Introduction

"AlphaX: Unleashing Potential, Catalyzing Innovation. As a dedicated crypto launchpad, AlphaX provides a robust platform for the debut of new cryptocurrencies.

With an emphasis on security, transparency, and efficiency, we strive to bring together project developers and investors, creating an ecosystem where cutting-edge crypto solutions are launched, nurtured, and propelled into the decentralized financial landscape.

With AlphaX, your crypto journey is set on the path of unlimited possibilities!"

# Benefits of LaunchPadX

- **Access to a Wide Audience:**

One of the significant benefits of using AlphaX is that it provides access to a broad audience of investors and crypto enthusiasts.

Launching your token on LaunchPadX allows you to tap into the platform's user base, which will help you gain traction and exposure. This can be especially helpful for new projects trying to build a community around their token.

- **Trust and Credibility:**

Launching your token on AlphaX can provide you with an added layer of trust and credibility. The platform is renowned for vetting new projects and ensuring they meet specific criteria before being approved for launch. This can help investors feel more confident about investing in your project, which can be crucial for building a successful launch.

- **Capital Raising:**

Launching a new crypto project can be expensive, and many projects struggle to raise the necessary capital to get started. AlphaX provides a platform for projects to raise capital through a token sale. This can help projects secure the funding they need to get started and allow investors to get in on the ground floor of a promising project.

# How AlphaX Works

- **Project Application:**

To launch your project on AlphaX, you will need to apply. The application will include information about your project, such as its mission, team, and timeline. The AlphaX team will review your application and determine if your project meets our criteria for launch.

- **Token Sale:**

If your project is approved for launch, you can sell your tokens on the AlphaX platform. Investors can purchase your tickets using cryptocurrency, and the funds raised will be transferred to your project's wallet.

- **Trading:**

Once your tokens are sold, they will be listed on the AlphaX exchange, where investors can trade them. AlphaX provides a user-friendly interface for trading, and investors can buy and sell tokens using a variety of cryptocurrencies.

## AlphaX Features

- **Token Launch Dashboard:**

AlphaX provides a dashboard for managing your token sale. The dashboard includes information about your project, such as the token price, total tokens available, and the timeline for the token sale.

- **KYC/AML:**

AlphaX requires all users to complete a KYC/AML process before participating in a token sale. This ensures the platform complies with regulatory requirements and helps prevent fraud and money laundering.

- **Smart Contracts:**

AlphaX uses smart contracts to facilitate token sales and trading. Smart contracts provide high security and transparency, ensuring all transactions are executed according to the predetermined rules.

# Tokenomics

The funds will be allocated for marketing activities and exchange listings.

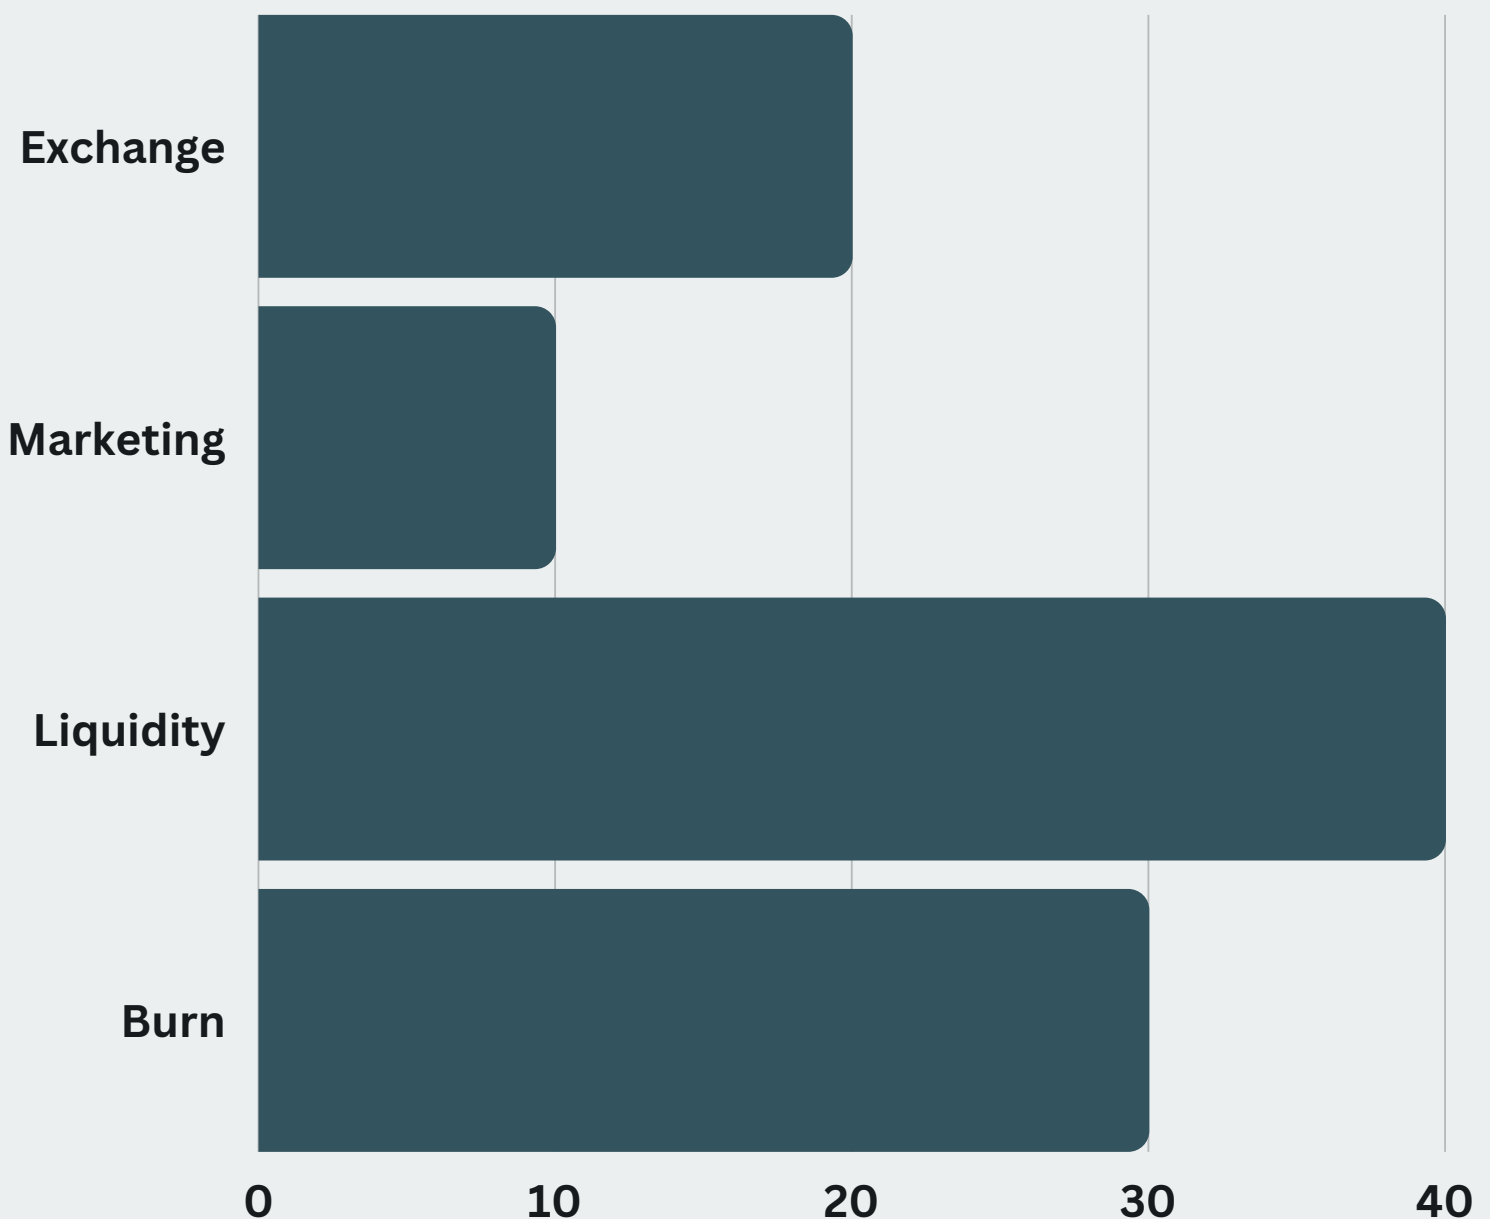

The supply distribution is as follows:

- 40% for Liquidity
- 20% for Exchange Listing
- 10% for Marketing
- 30% for Burn

A tax of 6% will be levied on both buying and selling transactions, and it's structured in this manner:

- 2% for Marketing
- 1% for Liquidity Provision
- 2% for GroveCoin Rewards
- 1% for GroveCoin BuyBack & Burn

With this structure, AlphaX is committed to balancing growth, liquidity, and value for its holders.
